Assumed Subject Knowledge 2015

Assumed Subject Knowledge is the level of subject knowledge that a lecturer or a tutor of a first year UNSW Canberra at ADFA course could reasonably expect all students enrolled in that course to know at the outset.

If you do not have the minimum level of Assumed Subject Knowledge, you are NOT prevented from applying for admission or enrolling in any courses, when the degree program begins, but you will be placed at a considerable disadvantage.

If you have not achieved the recommended minimum level of Assumed Subject Knowledge, you are strongly advised that it is in your best interest to undertake a bridging program or other preparation courses, such as UniLearn: www.unilearn.net.au.

Assumed Subject Knowledge Expressed by Degree

Year 11 and 12 subject choices are important to meet UNSW Canberra Assumed Subject Knowledge requirements.

**Bachelor of Engineering (Aeronautical), (Civil), (Electrical) or (Mechanical)**
